

DIV.12

DIV.12 is a manufacturer of contemporary furniture located in Alberta, Canada.

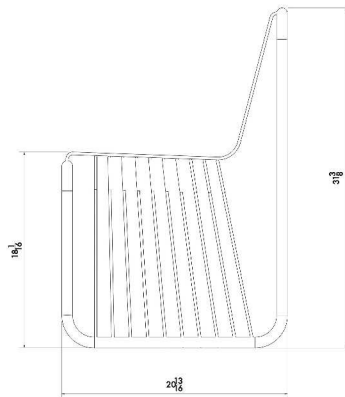

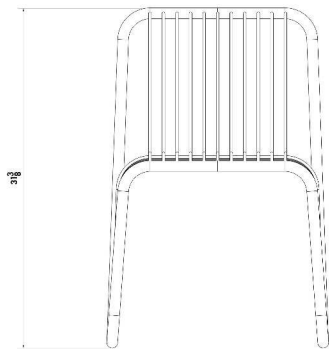

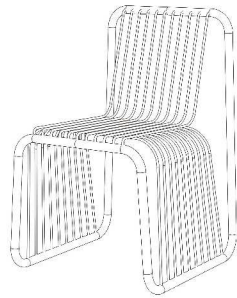

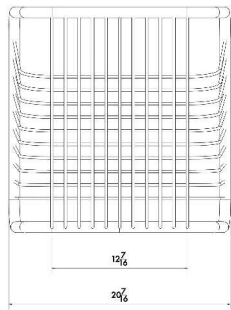

Our collection is custom built to last through our use of quality materials and seasoned craftsmanship. As the primary manufacturer we control every aspect of production, ensuring the integrity of each product from prototype to final installation.

Our passion for developing new furniture is rooted in the elegance of modernist design and driven by an appreciation of clean forms, brilliant colors and the deep, rich quality of natural materials.

We design and build furniture for commercial and residential applications - we believe that good design should work in both spaces.

We look forward to working with you..
